**gRPC**: Next Generation Service Infrastructure

- Developed gRPCurli - a LinkedIn wrapper over **gRPCurli** that lets you interact with gRPC servers. It's basically curl for gRPC servers.
- Implemented some important features in gRPCurli such as Invocation Context, RPC header, Distributed Tracing, Datavault authentications, DV Fast access, D2 Proxy, Call tree and Streaming.
- Distributed to 500k systems including Prod, Corp and Dev.
- Working on gRPC service exploration in **Sceptre** (Service Discovery - to discover, explore and experiment with gRPC resources and APIs).
- Working on Discovery and Exploration of **Entity Relationships** for LinkedIn as a whole.

**Traffic Insights**: Built a reusable gRPC library to provide LinkedIn-wide access to real-time traffic metrics—including traffic percentage, online bucket count, and shift reasons—enabling seamless integration across internal services and tools.

**Ravens**: Notification subscriptions via email, call, messages and slack for incidents.

- Enhanced rate limiting for message and call notifications.
- Developing GenAI-powered incident summaries to streamline response workflows.

**Site Health**: Health status of different verticals such as traffic status, Issue Auditing, DB Mappings, Loadtest & Growth Dashboards.
